THE POWER OF **CONNECTED**

# COMMERCIAL UAV INSPECTION SERVICES

Utilize the Power of Data and Drones

# Commercial UAV Inspection Services

Data insights can now take flight with the power of connected data and drones

Honeywell's Commercial UAV Inspection Service utilizes certified Honeywell UAV pilots and state-of-the-art UAV technology to streamline and standardize routine industrial inspections. From oil and gas to utilities to transportation infrastructure, Honeywell offers customized web portals, data analytics, storage, data management and reports tailored to the unique needs of each customer.

## DRONE AND PILOTS

- Specific drone utilized and tailored to your industry segment
- Airspace management and coordination with all current required airspace regulations
- Certified and trained pilots

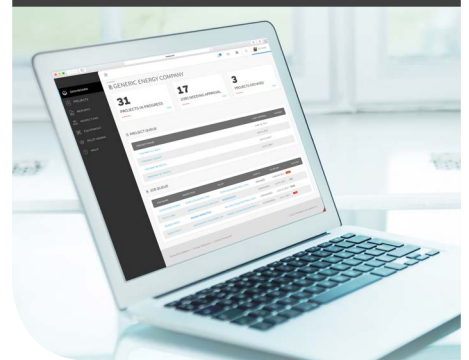

## INSPECTOR APP

- Pictures, annotation and mark-up capabilities
- Command and control onboard sensors
- Mission planning, data tagging, photo classification and annotating

## WEB PORTAL

- Enhanced data visualization and reporting
- Searchable and standardized data from every inspection at your fingertips
- Optimized operations

## SAFETY

Keep boots on the ground. Commercial UAVs allow for better inspection viewpoints, safer working distances and improved worker safety.

## SERVICE

Honeywell's Inspector App, skilled UAV pilots and fleet of state-of-the-art UAVs provide best-in-class, onsite service that works together with your team.

## STANDARDS

Leverage the growing capabilities of automation and autonomy to create repeatable, reliable inspections time and time again. No more eye balling, no more subjectivity, just really good data.
